*Tying Tips:* It's a very simplistic pattern. Completed fly should be  $\frac{5}{8}$  to  $\frac{3}{4}$  inches long. If you are going to fish this fly wet add weight prior to tying.

*Fishing Tips:* The fly can be fished wet or dry. It works for trout, bass, bluegills and crappies. The fly should be fished with a slow upstream striptease method of retrieve.

*Historical Note:* This fly was created by Terry Klavinski, a fly tier and river guide of Coldwater, MI. The fly was created around 1985.
