

Regan's Black Caddis

Recipe

- Hook: Mustad #94840 Size: #18
Thread: Black, 6/0
Body: Black Thread, tied full length of the shank.
Wing: Dark Deer Hair, tied down wing, then pull the butt ends up to form the post for the parachute tie.
Hackle: Brown & Grizzly mixed, tied parachute, trim off the post.

Tying Tips: The pattern pictured is a female. The only adjustment to your pattern is that you tie in a Lime Green Yarn Egg Sac, cut short. Jerry prefers the deer hair from the back of a mid-October killed deer. Some fishermen tie this in a size #16.

Fishing Tips: Fished during the “Chimarra” hatches from late April through August.

Historical Note: Jerry Regan is the acknowledged expert on ‘old’ Michigan Flies. He is a third generation tier who ties both commercially and professionally. He created this pattern around 1990.
